

SYSTEMS AND METHODS FOR A DIGITAL INFORMATION AUTOMATED TELLER MACHINE

Abstract of the Disclosure

Systems and methods for implementing a retail transaction at a digital information ATM are disclosed. Paper and blank electronic media may be purchased at the ATM. The electronic media includes CD-ROMs, DVD-ROMs and floppy disks. A computer file may be transferred to the storage media as part of the transaction. The file may be transferred from any external electronic media. Thus, the file may be transferred from a remote computer accessible via the internet. Alternately, the file may be transferred from any storage media controlled by a portable digital device, such as a digital camera, a cell phone, a portable computer or a PDA. Alternately, the file may be transferred from a remote storage device accessible via the Internet to either media sold at or external to and in communication with the digital information ATM.
